# National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. **Place additional certification comments, entries, and narrative items on continuation sheets if needed (NPS Form 10-900a).**

**Narrative Description**

*(Describe the historic and current physical appearance of the property. Explain contributing and noncontributing resources if necessary. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, setting, size, and significant features.)*

**NARRATIVE DESCRIPTION**

***Summary Paragraph***

Built in 1922, the Louise Chandler Anderson House is located on Manito Boulevard, a well-preserved, divided, tree-lined street with a center landscaped parkway in Spokane, Washington. The single-family Anderson House is a fine example of the American Foursquare form, and is distinguished with a box-like rectangular footprint, two full stories, a low-pitched hip roof, symmetrical fenestration patterns, a full-width covered front porch, and a prominent Prairie-style front entrance door. Horizontal emphasis is achieved by the home's low-pitched hip roof and hip roof dormers, widely overhanging boxed eaves, wide cornice, modillion course, brick belt and soldier courses, and a very low-pitched front porch roof which is supported by thick square porch pillars and an enclosed porch wall. The house, porch wall, and square porch pillars are all clad with variegated red brick veneer while the dormers are covered with split wood shingles. In contrast to the home's red brick veneer cladding at the first and second floors, basalt rock ashlar is used to form a raised foundation. The Anderson House retains a high degree of architectural integrity in original location, setting, design, materials, workmanship, feeling, and association as a single-family home.

**CURRENT APPEARANCE & CONDITION**

***Site***

The Anderson House is built in the center of Lot 17 on Block 44 in the Manito Park Addition on Spokane's South Hill. The lot measures 50 feet wide, 142 feet deep, and faces west as it fronts South Manito Boulevard. The boulevard was developed as a groomed lawn and treed parkway that separates a paved city street—one half of the street is located on the east side of the parkway and runs north, and the other half of the street is located on the west side of the parkway and runs south. The house is built on a slight west-ward facing slope which abuts the one-way-north-only street at the east side of the parkway. The property is framed by maple trees, shrubs, manicured lawn, and a paved driveway at the north border of the property. The home is part of a socially and architecturally prominent historic residential neighborhood which was developed during the first half of the 20<sup>th</sup> century with single-family homes situated along a directionally correct grid work of paved streets. The Manito Boulevard parkway is a focal point of the neighborhood and provides a landscaped link to Manito Park, an Olmsted Brothers-inspired city park which is located in the neighborhood ten blocks north of the Anderson House.

***Exterior of the House***

The exterior of the Anderson House is clad with raked, variegated red face brick veneer. The wood trim on the house is painted white and contrasts well to the red brick veneer cladding and black basalt foundation stone. The home follows a rectangular footprint which measures 30 feet wide and 43 feet deep, and has a full-width front porch at the first floor which measures 26 feet wide and 10 feet deep. The house is wood-frame platform construction, has two full stories, a low-pitched hip roof which is covered with composition shingles, and three center hipped dormers with one each at the west, south, and north roof slopes. At the north elevation of the house, a single exterior brick chimney rises from grade and penetrates the roof eave. The boxed eaves of the house are prominent with a wide overhang, plain cornice, and scroll-sawn modillion course. Dormer eaves are also widely overhanging with plain cornices but without the modillion courses. The dormers are clad with original straight-cut wood shingle siding and provide illumination to the attic through original 8/1 double-hung, wood-sash windows. The windows at the first and second floors of the house are original and feature a combination of 6/1 and 8/1 multi-paned wood-sash double-hung window units, multi-paned stationary window units, and multi-paned sliding window units. The windows are capped with brick soldier courses, and are supported by brick window sills. Basement windows are multi-paned awning windows with wood sashes (some windows are partially missing and covered with plywood boards).

**ANDERSON, LOUISE CHANDLER, HOUSE**

Name of Property

**SPOKANE COUNTY, WA**

County and State

***West Façade***

Facing west, the façade of the house is embellished with a symmetrical design, symmetrical fenestration patterns, and a full-width covered front porch at the first floor. The porch is covered with a very low-pitched hip roof, and like the dormers and house, has widely overhanging eaves with a plain cornice. Large square brick pillars support the porch roof and are joined together by a brick porch wall. The wall is capped by molded concrete coping and is articulated with brick lozenge designs and a brick soldier course. The brick soldier course separates the brick veneer cladding at the first floor from a black basalt rock ashlar foundation wall. Flanked by a black basalt rock ashlar stairway wall that matches the black basalt rock ashlar foundation, a center concrete staircase with five steps ascends from a brick paver-lined walkway in front of the house to a concrete porch deck. The porch deck is partially encircled by the brick porch wall. The porch ceiling is covered with original wood V-groove paneling which is painted white. The encircling porch wall is interrupted with an opening at the northeast corner of the porch, and forms an entrance to concrete steps that descend to a paved driveway at grade. A front entrance with a single door is centered at the west façade of the house and is flanked by two identical 8/1 double-hung, wood-sash windows. The door is made of solid oak with an oak veneer which exhibits a rich, deep brown-colored patina. The front door is 40 inches wide and is distinguished with deeply beveled divided lights and a unique geometric design influenced by the Prairie style. The second floor at the west façade of the house has a center entrance door which opens onto the porch roof, and is flanked by two identical 8/1 double-hung, wood-sash windows. Like the windows, the door is multi-paned and painted white.

***South, North, and East Faces***

The north, south, and east elevations of the house match the home's west façade in that they are also clad with brick veneer at the first and second floors, and are supported by a black basalt rock foundation. The raised foundation is prominent and punctuated by multi-paned basement awning windows. Some of the windows are covered with painted plywood boards but all are original. Like the west façade of the house, the three elevations are embellished with a brick soldier course that separates the basalt foundation wall from the brick cladding at the first floor, and with a projecting brick belt course which breaks up the planar wall surface of the house as it separates the first floor from the second floor. As the belt course extends around the house, it also forms window sills for second-story windows. The north elevation features a side entrance door at grade and a brick chimney that runs up the wall and penetrates the eave. Two small multi-paned fixed windows flank the chimney at the first floor. The rear east elevation is divided into three bays at the second floor with each bay holding four multi-paned sliding windows. Altogether the rear elevation windows at the second floor form a strong horizontal window row with 12 multi-paned windows. Below the row of second-floor windows at the rear east elevation is a set of multi-paned French doors (installed in 2009) which is flanked by original multi-paned double-hung windows. The French doors open onto a frame deck (installed in 2010).<sup>1</sup>

***Interior of the House***

The front door at the west façade opens into a spacious living room which extends across the width of the house from the north wall to the south wall, measuring 30 feet wide and 18 feet deep. The north wall is distinguished by a center fireplace and built-in flanking bookcases with wood doors and multi-paned glazing. A surround and hearth made of dark brown glazed ceramic tile frame the firebox which is filled with a gas-fired fireplace insert. A thick square-cut wood mantel caps the fireplace and extends uninterrupted across the top of the built-in bookcases. The south wall opposite the fireplace is distinguished with floor-to-ceiling built-in bookshelves which flank a center built-in window seat under a multi-paned window. The ceiling is nine feet high, the floor is oak plank, the walls and ceiling are original lathe and plaster construction, and the woodwork is painted white and features plain, oversized, square-cut floor molding, crown molding, window and door surrounds, and built-ins.

<sup>1</sup> A small concrete porch stoop with steps is located at the rear of the house under the attached porch deck. It is assumed that the porch stoop/steps led to the home's back entrance, which was removed sometime between the 1960s-1980s.

**ANDERSON, LOUISE CHANDLER, HOUSE**

Name of Property

**SPOKANE COUNTY, WA**

County and State

The living room opens through multi-paned French doors into a formal dining room at the center south wall. Like the living room, the dining room has a nine foot-high ceiling, original lathe and plaster construction, oak plank floor, and oversized square-cut woodwork. Located east of the living room and north of the dining room is a service hall which leads to a kitchen. The service hall is intersected by a stairwell that ascends to the second floor, and another flight of stairs that descend to a north elevation exterior side door, turn at the landing, and descend to a basement (partially below grade). The kitchen features a nine foot-high ceiling, oak floor, and built-in painted wood cupboards and cabinets with polished granite countertops (2009 remodel). The kitchen opens south through a wide entrance to a back hall and a powder room (2009 remodel). The back hall has built-in cupboards and storage closets, and the powder room contains a toilet, washbasin, and shower stall. French doors (2009 remodel) located on the east wall in the back hall open to an outside deck.

A 4-foot-wide stairwell ascends from the first floor to a wide center hall at the second floor. The hallway extends from the east end of the house to the west end. It opens to a full hall bathroom (north wall), two bedrooms (south wall), enclosed sleeping porch (east wall), and a master bedroom/bathroom suite (west wall). The ceiling is eight feet high, the walls are original lathe and plaster construction, the floor is refinished fir plank (except in the bathrooms which are covered with ceramic tile), and the woodwork includes oversized, painted, plain, square-cut molding and surrounds like that at the first floor of the house. The basement is partially finished with storage and laundry rooms but is mostly unfinished with a large mechanical room. Radiant heat is provided by gas-fired hot water which is transported throughout the house by original cast iron radiators at the first and second floors.

**ORIGINAL APPEARANCE & SUBSEQUENT MODIFICATIONS**

According to Sanborn Fire Insurance maps dated from 1926-28 and 1953, and a Spokane County Assessor's photograph from 1960, the exterior of the Anderson House retains nearly the same appearance as it did when it was built in 1922. Exceptions include current roof shingles, a replacement wood side door at the north side of the house, and replacement metal French doors at the home's east rear. The home's footprint is original, the American Foursquare form is original, window design and placement are original, the Prairie-style wood front door is original, brick veneer and belt courses are original, black basalt rock ashlar foundation is original, and the front porch and steps include original designs and materials. The home's interior floor plan is original except for the kitchen/back entry/powder room which has been remodeled at least twice since the house was built in 1922.

Modifications to the house include:

- |         |   |
|---------|---|
| 1960    | Kitchen remodeled and powder room installed on first floor in home's southeast corner (Spokane City building permit #B-47316, dated March 22, 1960).  |
| 2005    | Living room fireplace surround and hearth remodeled with glazed ceramic tile; gas insert installed in firebox; recessed ceiling light fixtures installed in kitchen; kitchen remodeled.   |
| 2006    | Composition shingle roof installed (original wood shingle roof was replaced at least twice before 2006); exterior trim painted; north elevation side door replaced; HVAC and electrical system upgraded.  |
| 2008-10 | <i>Exterior:</i> front door refinished; wood trim, porch deck, porch steps, dormers, soffits, modillions repainted; north elevation side door repainted.<br><br><i>Interior:</i> wallpaper removed, walls and ceilings repainted, wood floors refinished, kitchen remodeled, back hall remodeled, living room built-in bookcases and window seat on south wall installed (originally this wall was plain with no built-ins), second floor hall bathroom remodeled, master bedroom closet remodeled into closet and bathroom, built-in linen cupboard installed on south wall in second-floor hallway, period-appropriate light fixtures installed throughout house. |

County and State

***Garage***

A private double-car, single-story, wood-frame garage was built in 1922 for \$150 (Spokane building permit #16736), and is sited in the northeast corner of the property behind the house. It is not known with what the garage was originally clad but in the 1990s, the garage was covered with painted vertical wood siding. The garage faces west and has a low-pitched gable front roof which is covered with composition shingles. A metal overhead garage door opens from the west façade, and is flanked on the south by a metal pedestrian door. Due to exterior modifications and loss of original design and materials, the garage retains poor exterior architectural integrity and is regarded as a "non-contributing historic resource" of the property.

**8. Statement of Significance**

**Applicable National Register Criteria**

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- ☐ A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☒ B Property is associated with the lives of persons significant in our past.
- ☒ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ D Property has yielded, or is likely to yield, information important in prehistory or history.

**Criteria Considerations**

(Mark "x" in all the boxes that apply.)

Property is:

- ☐ A Owned by a religious institution or used for religious purposes.
- ☐ B removed from its original location.
- ☐ C a birthplace or grave.
- ☐ D a cemetery.
- ☐ E a reconstructed building, object, or structure.
- ☐ F a commemorative property.
- ☐ G less than 50 years old or achieving significance within the past 50 years.

**STATEMENT OF SIGNIFICANCE**

*(Provide a summary paragraph that includes level of significance and applicable criteria.)*

**Summary Paragraph**

The Louise Chandler Anderson House in Spokane, Washington is eligible for listing on the National Register of Historic Places under Criteria B as the home of a prominent state university educator, Louise Chandler Anderson. Additionally the property is eligible under Criteria C as a textbook example of the American Foursquare house form, and as a product of accomplished, award-winning Spokane architect/builder, M. Randolph Smith. Built in 1922, the house was erected for Louise Chandler Anderson and her two sisters who together lived in the home for 37 years. Anderson achieved particular historic significance in the community from 1915 to 1956 as a leading university educator, department head, and professor emeritus at Eastern Washington University (EWU) where she made—according to the university's president in the 1950s—a “monumental contribution”<sup>ii</sup> to the college and to “education in [the] state” of Washington.<sup>iii</sup> Anderson's significant accomplishments were honored by EWU when a women's college dormitory on campus was named in her honor. The period of significance begins in 1922, the date the house was built, and ends in 1960, the date in which Louise Anderson ended her ownership and residency of the property.

**HISTORIC CONTEXT**

**Manito Park Addition**

Located atop the Manito Plateau on Spokane's South Hill between 14th and 33rd Avenues, and between Division Street and Hatch Road, the Manito Park Addition was platted in 1903<sup>iv</sup> before residential development and settlement of the plateau began. At that time, the area was characterized by natural, picturesque topography which was distinguished by an irregular hilly and rocky landscape with natural springs and wetland areas, spotty pine and cedar tree growth, wild grasses and farmland, and a sprawling multi-acre green space and groomed parkland called Montrose Park (now named Manito Park). Except for the park, the area was undeveloped and had great potential to be one of the finest residential neighborhoods in Spokane. A July 31, 1903 article in the *Spokane Daily Chronicle* described future plans for the neighborhood and reported that “two main drives through the Addition will be Grand Street and [Manito] Boulevard, running parallel with each other north and south, or lengthwise through the tract... The boulevard will be 175 feet in width with a 77 foot parking strip in the center.”<sup>v</sup> Influenced by Olmsted park designs,<sup>vi</sup> the plan for the boulevard with a center greenbelt/parking strip provided an important link, connecting the park with the groomed boulevard and the neighborhood.

At this time, noted Spokane real estate developer and businessman, Jay P. Graves, became interested in the area and saw an opportunity for residential development on the plateau, especially around the park. He purchased acreage in the Manito Park Addition and along with his brother, Spokane attorney Will Graves, formed the Spokane-Washington Improvement Company. The Graves brothers then reorganized and improved the area's existing transportation system—the Spokane & Montrose Street Railway which transported people to and from downtown Spokane. Recognizing the need for graded roads and infrastructure to be in place before residential plats could be successfully sold, Graves and his associates made a deal with the City of Spokane: Montrose Park and its 92 acres could be the City's if city coffers and contractors would pay for and install the needed infrastructure, specifically roads and an underground fresh water line. The deal was made and the name of the park was changed to Manito Park, which was derived from an Algonquin Indian word that meant “spirit” and “supernatural force that pervades nature.”<sup>vii</sup> Today,

County and State

Manito Park is one of Spokane's most popular and revered public parks, and the Manito Park neighborhood is regarded as a highly coveted residential area.

In 1907, Graves hired Fred Grinnell, a seasoned real estate salesman, to sell property in the Manito Park Addition. Grinnell placed advertisements in fliers and local newspapers, proclaiming that "the Manito residence section is known as one of the most desirable residence sections of the city." He applauded plans for the development of Manito Boulevard, "which is to be the show street of the city."<sup>viii</sup> Another 1907 newspaper advertisement announced the following:

***Some Facts About Manito***  
*10 miles of cement sidewalks*  
*62 houses now under construction*  
*1600 shade trees planted along the streets*  
*\$35,000 spent in the public park*  
*12 miles of graded street*  
*7 miles of water main laid*  
*207 houses completed in 3 years*  
*Several miles of gas mains laid<sup>ix</sup>*

Manito Boulevard, Manito Park, the addition of city-financed infrastructure, and the high plateau site for the Manito Park Addition on Spokane's South Hill lured architects, builders, and prospective homebuyers to the area. Aware of the need for architectural compatibility and land use controls, Jay P. Graves, through his Spokane-Washington Improvement Company, initiated subdivision regulations as "binding covenants" which became a legal part of each property's warranty deed. Although initially prepared in 1903, the covenants were designed to run in perpetuity with the land as the property was developed for successive homeowners. The following covenant conditions included:

1. *Any residence built on any lot facing Grand Boulevard, Manito Boulevard, or Manito Park shall not cost less than \$5,000.*
2. *No residence built on any of the remaining lots in said addition shall cost less than \$1,500.*
3. *All buildings shall be of modern style of architecture.*
4. *No outhouse or barn shall be erected and used as a dwelling before the construction of the main dwelling house.*
5. *No building erected on any of said lots shall be used for business purposes of any kind.<sup>x</sup>*

The aforementioned covenants were put into place, and architects and builders got busy designing and building single-family homes for the next 50 years from 1903 to the 1950s. Styles ranged from Colonial and Tudor Revival examples to Craftsman, Prairie, and Minimal Traditional traditions. Public schools were built, churches erected, park and landscaping work in Manito Park progressed, and by the 1950s, development and settlement in the Manito Park Addition was largely complete. Manito Park and Manito Boulevard, the street along which the Anderson House is sited, have proved to be immensely popular amenities in the neighborhood. Together with protective covenants and well-preserved homes, the Manito Park Addition continues to be one of Spokane's finest residential sections and continually demands higher real estate values than other parts of the city.<sup>xi</sup>

## HISTORIC SIGNIFICANCE

On February 16, 1922, three sisters—Marguerite Chandler, Rachel Chandler Meadors, and Louise Chandler Anderson—purchased the property at 3003 S. Manito Boulevard from the Spokane-Washington Improvement Company. A year earlier in 1921, prominent Spokane architect, Randolph Smith, agreed to a legal option with Frank Graves, owner of the company and developer of the neighborhood, who gave him the opportunity to design several homes in the Manito Park Addition, including the nominated house. According to Spokane

County and State

building permit #16735 dated May 1, 1922, construction of the house cost a reported \$7,000—which is \$2,000 more than the neighborhood's covenant requirement for homes erected along Manito Boulevard. Smith's three-bedroom-with-large-sleeping-porch house design appealed to the three sisters who did not change the home's original floor plan and design for 37 years during their residency from 1922 to 1960.

***Louise J. Chandler Anderson (1886-1979)***

The Chandler family came to Spokane around 1900. Robert and his wife Macca, had five children; two boys and three girls: James Jr. (1880 - ?), Carey (1884 - ?), Rachel (1886-1956), Marguerite (1890 - ?) and Louise (1886-1979). The kids were teenagers by the time the family moved to Spokane, but they were a close-knit group and would live together for most of their lives.

Their oldest daughter Rachel was married to George Meadors (1879-1913) in 1910, and worked for the Hazelwood Dairy. After her husband suddenly passed away in 1913, Rachel worked for various businesses as a telephone/telegraph operator and personnel supervisor. Marguerite their youngest daughter, became a teacher and taught at the Northwest Business College in Spokane. Carey moved to San Francisco around 1910 and became a theater manager. At this time no information has been located about James Jr.

Their middle daughter Louise was born on April 18, 1886 in McKenzie, Tennessee. In 1907 at the age of 21, she married Roy D. Anderson. After the untimely death of her husband in 1911, she became a teacher at Eastern Washington State College (now EWU) in Cheney in 1915. A close knit family, in 1922, the three sisters decided to buy a home together and moved into the newly completed nominated house on Manito Boulevard. By that time, Louise and Rachel had been widowed for over 10 years and Marguerite remained unmarried.

Over the course of the next 40+ years, Louise made a lasting impact in the field of education, especially for women, while teaching at Eastern Washington University (EWU) from 1915 to 1956. During her career she advocated for more in-depth and advanced curricula requirements for student graduating with degrees in both education and home economics at EWU. As part of this process she helped spearhead and implement the creation of new programs. Her advanced study and work at the University of Washington, Oregon State University, the University of California at Berkeley, and the Teacher's College at Columbia University (1940) reflected Anderson's career-long continuous and unbounded commitment to EWU. The following include excerpts from Louise Chandler Anderson's 1979 obituary:

*Mrs. Anderson taught in the EWU home economics department for 41 years. She retired in 1956, a year after a women's dormitory at the university was named in her honor. She worked one year beyond the usual retirement age on the recommendation of Don S. Peterson, then EWU President, and the Board of Trustees. Mrs. Anderson "made a wonderful contribution to education in this state," Patterson said when she retired.*

*She enrolled at the old Cheney State Normal School (now EWU) in 1913 and was awarded her life teaching certificate in 1918. She did advanced work at Teacher's College at Columbia University in 1919-20, and later did more advanced work at the University of California at Berkeley, at Oregon State University, and at the University of Washington. She was a longtime advisor to Tawanka, the women's honorary at EWU.<sup>xii</sup>*

Two plaques, which were placed in the front entrance of Anderson Hall, a women's dormitory on the EWU campus, gave the following summary:

*Louise C. Anderson taught at the college from 1915 until 1956. She was first with the Hot Lunch Department at the Training School from 1914 until 1920, and from 1921 until her retirement in 1956, taught Home Economics courses, particularly in Foods & Nutrition. In 1948 she was made an associate Professor of Foods & Nutrition, and in 1955 was promoted to the Chairmanship of the Home Economics Department. She was granted Emeritus status in 1956. At its regular meeting on*

**SPOKANE COUNTY, WA**

Name of Property

County and State

*March 12, 1955, the Board of Trustees voted to name the New [Women's] Dormitory for Mrs. Louise Anderson, the Chairman of the Home Economics Department.*

*Louise Anderson Hall was part of the post-World War II expansion on the campus. Plans for a new women's dormitory were made in 1949, and on August 2, 1949, the college began selling \$700,000 worth of bonds to finance the construction of a new women's dorm. Construction of the three-story U-shaped brick structure began after the bond sales, and the building was completed in the summer of 1951 at a cost of \$810,000. It was placed in service in the fall... at the beginning of the 1951-52 academic year, and was simply called the "New Dorm." At the time it was finished, it contained a kitchen and dining room, and provided food service for students living on campus prior to the construction of Tawanka Commons, the campus food service center, in 1964.<sup>xiii</sup>*

Louise Chandler Anderson outlived her two sisters with which she shared the nominated house, and died January 3, 1979 at the age of 92. As an educator at Eastern Washington University for more than four decades, Anderson was eventually promoted to a department head. During the immediate post war era, Anderson received a fair amount of press in the Spokane newspapers via reports of classes and lectures she was giving on a variety of topics such as: strengthening family life, nutrition, child care and cooking. She resided at the nominated house during the height of her career.

**Subsequent Homeowners**

On April 1, 1960, Spokane residents William & Margaret Mary Tormey purchased the property for \$17,000. After her husband's death, Margaret Mary Tormey sold the property in 2002 for \$224,000 to Shawna & Brian Campbell, a Spokane heating/plumbing contractor (Halo Heating). In 2006, the Campbells sold the house to retired WSU education professor, Dr. Linda Warren Holloway.

**ARCHITECTURAL SIGNIFICANCE**

The nominated house embodies the distinctive characteristics of the American Foursquare house type represents the work of noted Spokane Architect M. Randolph Smith.

**American Foursquare House Form**

The American Foursquare was one of the most popular house forms to emerge in the United States from 1900 to 1930. During that time space the house form was built in thousands of cities and rural communities throughout the country. As explained by American architectural historian Robert Schweitzer in his book, *Bungalow Colors: Exteriors*, the American Foursquare house form was especially "ideally suited to urban environments and included the ability to squeeze three or four bedrooms into a really narrow plan. This was ideal for homes that had to be built on...thin urban lots..."<sup>xiv</sup>

*Known by a variety of names such as Edwardian, American Basic, Box House, and Corn-Belt Cube, the Foursquare (its contemporary name) started appearing widely around the turn of the century. The foursquare shared the bungalow's virtues of practicality and simplicity, and even carried those ideals a bit further as [American] Foursquare homes tended to be less ornate than their bungalow counterparts.<sup>xv</sup>*

Nationally acclaimed architectural historians, Lee & Virginia McAlester, illustrated and described the American Foursquare form in their book, *A Field Guide to American Houses*, as a "simple square or rectangular plan" with a "low-pitched hip roof and symmetrical façade."<sup>xvi</sup>

*One-story wings, porches, or carports are clearly subordinate to the principal two-story mass. The entrance, which may be centered or off-center, is a conspicuous focal point of the façade. This was the earliest Prairie form and developed into the most common vernacular version.<sup>xvii</sup>*

**ANDERSON, LOUISE CHANDLER, HOUSE**

Name of Property

**SPOKANE COUNTY, WA**

County and State

Commenting on the special interior arrangement of rooms which occurs in many foursquare house forms, the *Dictionary of Architecture & Construction* defined the American Foursquare house form as a one- or two-story home having a "square floor plan consisting of four rooms."<sup>xviii</sup> While not true for every foursquare home built in America, many homes of this type are distinguished with four large rooms on the main floor—one in each corner of the house.

In his book, *The Comfortable House: North American Suburban Architecture 1890-1930*, architectural historian and MIT professor Alan Gowans pictured homes of similar design and form to the Louise Chandler Anderson House, and gave the following description:

*Two stories high, set on a raised basement with the first floor approached by steps, a veranda running the full width of the first story, capped by a low pyramidal [hipped] roof that usually contains at least one front dormer, and an interior plan of four nearly equal sized rooms plus side stairwell—that is the form of house known variously as the box, the classic box, the double cube, the plain house, and...the foursquare. The fundamental visual effect is balanced and symmetrical. Everybody knows this form; every North American town built in 1930 has dozens, thousands of them, and the countryside is full of them...*<sup>xix</sup>

The Louise Chandler Anderson House is a tangible demonstration of the American Foursquare house form. It was built in 1922 during a time when the foursquare house was particularly in vogue across America, and was designed with many of the above-referenced identifying foursquare features. The house depicts identifying elements of the American Foursquare form including two full stories, rectangular box-like footprint, low-pitched hip roof, how-pitched hip dormers, dormers centered on roof slopes, full-width covered front porch, massive square porch pillars, conspicuous front door centered at façade, symmetrical façade design, double-hung windows, and four interior rooms in each corner of the house.<sup>xx</sup>

**M. Randolph Smith, Architect & Builder (1889-1945)**

Prominent Spokane architect and builder, M. Randolph Smith, designed the Louise Chandler Anderson House in 1922. As cited in his obituary in 1945, Smith was a "widely known Spokane architect, designer and builder" who "designed and constructed...many of the finest homes on the South Side" (also called the South Hill) in Spokane.<sup>xxi</sup> Smith was born in 1889, came to Spokane in the early 1900s. He attended Lewis & Clark High School, and was employed at different times by the Vermont Loan & Trust Company, Arthur D. Jones Real Estate Developers, and by the Elmendorf & Pope Company (real estate and insurance). Beginning in 1916 Smith listed himself as a "building contractor" in both the alphabetical and classified business sections of the Spokane City Directory, and was later listed as an architect. While building his career in Spokane, Smith was chosen in 1920 as a winner of a Spokane Civic Art Award for his design of the Goodhue House, a Craftsman-style bungalow at 2411 S. Tekoa Street in Spokane. The home was selected by a jury of Northwest architects as "one of the five most notable examples of small house architecture in Spokane"<sup>xxii</sup> and was pictured on the front page of the real estate section in the October 24, 1920 edition of the *Spokesman-Review*.<sup>xxiii</sup> Six years later in 1926, Randolph Smith received honors, accolades, and a financial prize for his design of the George Visk House at 1105 E. Overbluff Road in Spokane. A two page advertisement in the *Spokesman-Review* noted:

*Liberty Weekly Magazine selected this Spokane home submitted by M. Randolph Smith, designer and builder, as one of the four model homes throughout the country to be featured in their magazine... The other three [winning homes] are at Bronxville in New York, Minneapolis, and Kansas City.*

<sup>xviii</sup> Harris, Cyril M. *Dictionary of Architecture & Construction, Third Edition*. New York: McGraw-Hill, 2000, p. 29.

<sup>xix</sup> Gowans, Alan. *The Comfortable House: North American Suburban Architecture 1890-1930*. Cambridge: MIT Press, 1989, p. 84.

<sup>xx</sup> While the living room at the Louise Chandler Anderson House is one large room that extends from north to south across the width of the home, the space suggests two rooms or conversation areas within one large room—one in the northwest corner and one in the southwest corner of the first floor. The northwest corner and north wall of the living room feature a fireplace around which furniture is usually placed and people congregate. The southwest corner of the room and the south wall are distinguished with a built-in window seat and built-in bookshelves separate from the fireplace area.

*\$1,000 was awarded this house plan by the Liberty Weekly Magazine in a nation-wide contest—only four prizes of \$1,000 each were awarded by the Liberty Weekly Magazine from all the plans submitted throughout the United States. This is a great honor for Mr. George M. Visk, the owner, and Mr. M. Randolph Smith, the designer and builder...<sup>xxiv</sup>*

Documented to date, the following is a list of homes built and/or designed by M. Randolph Smith in Spokane:

- |                                       |  |
|---------------------------------------|--|
| • 1012 W. 13 <sup>th</sup> Avenue     | built in 1914 (Smith lived in the house while he built it) |
| • 419 W. 24 <sup>th</sup> Avenue      | built in 1916 (Smith lived in the house while he built it) |
| • 1117 S. Wall Street                 | built in 1918  |
| • 620 W. Sound Avenue                 | remodeled in 1918 (interior)                               |
| • 2411 S. Tekoa Street                | built in 1922 ( <i>award winner</i> )                      |
| • <b>3003 S. Manito Boulevard</b>     | <b>built in 1922 (Louise Chandler Anderson House)</b>      |
| • 1011 E. Overbluff Road              | built in 1924  |
| • 1919 S. Oneida Street               | remodeled in 1924 with additional story                    |
| • 414 W. Sumner Avenue                | c. 1923 (house designed by K. K. Cutter)                   |
| • 1105 E. Overbluff Road              | built in 1926 ( <i>award winner</i> )                      |
| • 20 <sup>th</sup> & Manito Boulevard | built in 1929 (page 97 in <i>Storybook Style</i> )         |
| • 508 W. 21 <sup>st</sup> Avenue      | built in circa 1930s                                       |
| • 1428 S. Cedar Street                | built in 1935  |
| • 1511 S. Walnut Street               | built in 1938  |
| • 1521 S. Walnut Street               | built in 1938  |
| • 1517 S. Walnut Street               | built in 1938  |
| • 1507 S. Walnut Street               | built in 1938  |
| • 1204 E. Overbluff Road              | built in 1941  |

From physical evidence and information known about M. Randolph Smith and the variety of homes that he designed and built in Spokane, it is easy to conclude that Smith was an accomplished architect/builder, and prominent among his colleagues and contemporaries during his career. House forms and architectural styles, which Smith used for his home designs, include a kaleidoscope of styles; Tudor, Colonial Revival, Spanish Eclectic, and Mission traditions along with Craftsman-style bungalows and American Foursquare house forms. While some of Smith's work reflects vernacular examples such as the small Colonial and Tudor Revival-inspired houses he designed and built in the 1500 block of South Walnut Street, most of Smith's designs illustrate high styles such as the Tudor Revival-style Visk House at 1105 S. Overbluff Road, and the Spanish Eclectic-style home at 1011 E. Overbluff Road. The Anderson house is a good representative example of Smith's skill as a designer and builder.

## RANDOLPH SMITH, ARCHITECT, DIES

M. Randolph Smith, widely-known Spokane architect, designer and builder, died yesterday in his home, W1422 Ninth. Friends said he suffered a stroke a week ago. Mr. Smith was in his early 50s.

Many of the finest homes on the South Side were designed and constructed by Mr. Smith. He was a graduate of the old Spokane high school and for a time, early in 1930 was employed by the Vermont Loan and Trust company. R. G. Royer, vice president of the company, when he learned of his friend's death, recalled Mr. Smith was "one of Spokane's best-liked business men."

Mr. Smith is remembered for his real-estate development at Tekoa and Twenty-fifth, where he replatted property. One of his homes there was selected as "one of the five most notable examples of small house architecture in Spokane" by a jury of northwest architects.

Mr. Smith had many friends in the Spokane Rotary club.

Mrs. Smith died in 1930 and in 1937 Mr. Smith married Mrs. Fanny B. Cannon, who survives him. Other survivors are two daughters, Miss Jane Louise Smith and Miss Helen Karenda Smith, both at home, and a son, Capt. Maurice R. Smith, with the army engineers. Two brothers, Horace, Spokane, and Archie Smith, Mabton, Wash., also survive.

The body is at Smith's funeral home.

*"Randolph Smith, Architect, Dies." Spokesman-Review, 25 March 1945*
